BEFORE WRITING OR SENDING US COINS

The Prices Quoted in This Book Are Those We Pay for the Coins

If you want to buy coins, send 10 cents for our large illustrated selling list, showing our selling prices for coins and bills.

This Book is published to serve as a guide to the values of rare coins. All rare U. S. and other coins are quoted herein. The prices quoted are those we PAY, and depend entirely upon the conditions of the coins. If a coin is quoted at \$1.00 to \$5.00, it means that we will pay anywhere from \$1.00 to \$5.00, according to the condition of the coin.

THE FACE VALUE OF THE COIN IS ALWAYS INCLUDED IN THE PRICE QUOTED

If a half dollar is quoted at 50 cents, it indicates that it is worth only face value. The dates of U. S. coins not given in this book are not worth any premiums. It is therefore a waste of time for anyone to write for special quotations, etc. All questions as to conditions, prices, etc., are answered in this book. By reading pages 4 to 7 carefully before writing us or sending coins, much trouble and useless correspondence will be avoided.

When you write, be sure to enclose a self-addressed stamped envelope to insure reply. Our mail is so large that the postage on replies would amount to a considerable sum, while the cost to you is but 3 cents.

When writing or sending us coins, be sure to always give your name and address and mention the number of this book. The number is printed in red ink on the last page.

NOTE:—We fill orders the same day as received, but please remember there are three links to a mail order transaction—yourself, ourselves, the United States Mails; if any link is defective, an error occurs; letters and third class mail at times go astray; and at times we receive remittances without name and address. Despite all care on our side, errors will occur. If delay or non-delivery occurs, please seek a direct explanation before jumping to any conclusion. Remember, we may not be at fault; there are THREE links in the mail order chain. We do not reply to any inquiries unless return postage is enclosed.

Figure 1, \$20; first issue, date in Roman letters. 2, Ancient Greek coin with flying eagle. 3, \$10; with bevelled edge and periods. 4, Ancient silver coin of Egypt showing eagle similar as used on our new \$10 gold coins. 5, \$20; date in figures and no motto.

Important Information About Rare Coins

PLEASE READ

The invention and use of coins is attributed to the Lydians, a Greek nation, about 862 B. C., whose money was of gold and silver. The dating of coins was first adopted about the fifteenth century.

(For more information regarding the Ancient coins, see the photographic reproduction and explanations toward the end of this book. Read the Review of the Coinage of the World, in this book.)

The prices paid for rare coins are chiefly regulated by their state of preservation, the number of pieces issued of a certain date, and the demand for same. But neither the metal out of which the coin is made, nor the age, has anything to do with the prices paid.

The prices quoted in this book are the prices **WE PAY** for coins in good to proof condition (see "Conditions of Coins"), hence \$5.00 to \$10.00 means that we will pay anywhere between those prices, according to the condition of the coin.

NEVER CLEAN A RARE COIN. A somewhat corroded coin is oftentimes more valuable than a cleaned one. The cleaning of a rare coin considerably decreases its value.

Coins with solder marks on edge or on either side are of no value other than their intrinsic or metal value.

The prices offered in this book are not of mere guesswork. The book was prepared with the greatest care as to accuracy; after years of close study of the values of rare coins, with the assistance of years of experience gained in the coin business.

HOW TO SEND COINS

Single coins, bills or stamps, or small lots, may be sent by registered or insured mail. Large or valuable shipments should be sent by express. We do not accept delivery of express shipments with stated valuation of over \$50, unless you first mail us a list of the contents. All shipments are examined and offers made promptly and shipments held by us until our offer is accepted or rejected. When our offer is accepted, remittance is sent the very same day.

IMPORTANT: When sending coins, bills or stamps, **ALWAYS** enclose return postage and **REGISTRATION** fee, as we are not responsible for shipments sent or returned by ordinary mail. When writing for any information please be sure to always enclose stamped envelope for reply.

We devote our entire time to dealing in rare coins, medals, bills and stamps and have been in this business for over a quarter of a century and can serve you to your entire satisfaction, whether you wish to buy or to sell.

Classification of the Condition of Coins

The state of preservation of coins are classified as follows:

"PROOF"

Proof coins are especially struck from polished blanks and dies and finished by hand, which gives them a mirror-like, smooth, reflective surface. The most perfect condition known. The mint makes a small charge for the proof coins, and they can only be had during the year of the issue.

"UNCIRCULATED"

Uncirculated coins are coins struck for circulation. But coins, to be classified as "uncirculated," must be as new and bright as when dropped from the coining press; a coin that has been in circulation, no matter whether it shows no marks of wear, cannot be classified as uncirculated.

"FINE"

Fine coins are those which have seen considerable circulation, but every feature of the coin must show plainly. It must not show any bad scratches or nicks.

"GOOD"

Good coins are those which have seen considerable circulation, but every feature of the coin must show plainly. It must not show any bad scratches or nicks.

"FAIR"

Fair coins are those which are much worn, but on which the design, lettering and date are clearly visible.

"POOR"

Poor coins are those on which the design, lettering and date are almost obliterated. Poor coins, unless of a very rare date, are worth their intrinsic value only.

"MUTILATED COINS"

Mutilated coins are those with holes, bad cuts or scratches, or otherwise damaged, and are worth their intrinsic or metal value only.

"OVER-DATES"

When a die, made in one year, is used in a later year, by engraving one figure over another, the piece struck therefrom is called an "over-date." For instance, the same die from which the Cents of 1810 were struck was used in 1811, by sinking a 1 over the 0, and portions of the latter figures are plainly visible.

COUNTERFEIT RARE COINS

Counterfeits of Rare Coins may be divided into the following classes:

RE-STRIKES

Re-strikes are pieces made from the original dies, but at a later period than the date on the coin. Among the American coins we find re-strikes of the dollar of 1804, and of the half-cents of 1831, 1836 and 1840 to 1849. The re-strikes, of course, do not command near the price of the originals. At present the dies are destroyed after the expiration of each year.

ALTERED DATES

Altered dates are original coins which have been altered or tooled from one date to another, and these may justly be classed as forgeries. The rarer dates of the American coins are at times tampered with; especially the dollars of 1801, which are altered to the 1804. But an altered date can easily be detected by the aid of a good magnifying glass.

ELECTROTYPES

The front and back of electrotypes are made separately and are then stuck together, and they may be easily recognized by the mark on edge showing where the two sides have been joined together. They are also of wrong weight. The electrotypes, as a rule, are not made to deceive the uninitiated, but are simply made as copies of very rare coins, where the original of the rare coin cannot be purchased. Electrotypes may generally be split in two with a strong knife.

CAST COINS

Casts made from the original dies, are easily detected by their light weight or thickness. The lettering on cast coins is not as sharp as on struck coins, and the surface has a soft appearance, or else is covered with minute sand holes.

FORGERIES

Forgeries struck from false dies are mostly found of the rarer Colonial and U. S. pieces, also of rare ancient gold and silver coins. They are easily detected by anyone somewhat familiar with rare coins, as the weight of the forgeries is mostly incorrect, and the lettering and design are sharper than on the genuine.

THE TERMS USED TO DEFINE THE VARIOUS PARTS OF A COIN

The front or face of a coin is called the **Obverse**.

The principal object represented on a coin is called the **Type**.

The space between the type and the circumference is called the **Field**.

The lower portion of the area of a coin beneath the type, and separated from the rest of the field by a horizontal line, is called the **Exergue**.

Small objects represented either in the field or exergue as adjuncts to the main type are called **Symbols**.

Portions of a coin which are sunk below the level of the surface are said to be **Incuse**.

The hair of Liberty Head, when tied with a band, is called **Fillet Head**.

When the hair of Liberty Head is unconfined, it is termed the **Flowing Hair**.

The inscription on a coin is generally called the **Legend**.

When coins have inscriptions around the edge, they are called **Letter Edge**.

The Milled Edge refers to coins with edge like the U. S. silver coins of the present day.

Mint Marks are the small letters on coins denoting the place of mintage. The mint marks are found on the Reverse side of the coin. Coins made at the Philadelphia mint have no mint mark. For a complete list of the mints and the mint-marked coins, see "The U. S. Mint and Its Branches" in another part of this book.

THE MOTTO ON U. S. COINS

"In God We Trust"

Since the 1907 issue of \$10.00 and \$20.00 gold pieces appeared many are of the belief that all U. S. coins without the motto command a premium. This is not true. The motto was not placed on coins till 1864; the two-cent piece being the first coin bearing the motto. So, of course, all U. S. coins prior to 1864 are without the motto.

The prices quoted herein on all U. S. Coins are for Philadelphia Mint coins, unless otherwise mentioned.

(Coins without mint letters are of the Philadelphia Mint.)

NOTE:—There are many counterfeit quarters and half-dollars of 1853. They are made out of the 1853 with arrows and with rays, simply by removing the arrow heads and rays. Some are made out of the 1858, by changing the 8 into a 3. But these counterfeits can not deceive anyone interested in coins, as they can easily be detected by their weight. The genuine 1853 quarters and half-dollars without rays and arrows weigh more than those with arrows.

Private Issue of Gold Coins

The private or Pioneer coins, as they are sometimes called, were issued by private parties in the "Pioneer" days of the West and in the 30's in the Carolinas and Georgia. While not to be considered as legal coinage or legal tender, these pieces were accepted and passed current at a time when there was a pressing need of money with which to transact the business of the country. Such coinage is now prohibited by existing laws.

California Gold Coins

These coins were made as a substitute for the gold dust currency. The private firms making these coins were reputable, made their coins equivalent to and in some instances a trifle better than the regular United States gold coins. The following firms issued the coins and whose names appear on them: Augustus Humbert (United States Assayer), 1851 and 1852; Baldwin & Co., 1850 and 1851; Cincinnati Mining and Trading Co., 1849; Dubosq & Co., 1849; Dunbar & Co., 1851; Kellogg & Co., 1854 and 1855; F. D. Kohler, 1850; Massachusetts & California Co., 1849; Miners Bank, 1849; Norris, Griggs & Norris, 1849; Moffat & Co., 1849 to 1853; J. S. Ormsby & Co., 1849; Pacific Co., 1849; Templeton Reid, 1849; Shultz & Co., 1851; Wass, Molitor & Co., 1852 and 1855.

PLATE 26

UNITED STATES PATTERN COINS

Oregon Gold Coins

The issue of the Oregon gold coins was promoted by the same causes as in the other Western states—lack of convenient currency. After an unsuccessful attempt by the Provisional government to establish a mint, a private company—the Oregon Exchange Co., issued coins of the \$5.00 and \$10.00 denominations. The mint was erected at Oregon City; the necessary coining apparatus was made by a blacksmith.

1837 Three-cent pieces, same as above.....	.50

WAR TOKENS

These tokens were issued by different parties during the Civil War. There are about 500 different varieties; they are the size of the small cent. None are very valuable. We pay \$1.50 per 100 pieces.

COMPOSITION SPIEL MARKS

These pieces were all made about the middle of last century and are somewhat in imitation of the U. S. \$2.50, \$5.00, \$10.00 and \$20.00 gold pieces and were originally issued as counters. They are of no value.

HARD TIMES TOKENS OR JACKSON CENTS

Issued in 1834 to 1841. There are about 150 varieties, all are about the size of the large copper cents; some were struck in brass. Their issue was prompted by the currency question, which was then a great political issue and all bear inscriptions politically significant. There are a few rare varieties, but the greater portion are common and for which we pay from \$2.50 to \$5.00 per 100 pieces.

Coins of the Confederate States

HALF-DOLLAR

1861 Struck at the New Orleans mint after the seizure by the Confederacy. The obverse is the same as the regular U. S. issue of that time. Only about four pieces were struck by the Confederacy. They are now very valuable. A number of re-strikes were issued at a later date.

We pay for the re-strikes.....\$5.00 to \$10.00

The United States Mints

The U. S. coins were issued at six different mints: Philadelphia, New Orleans, San Francisco, Carson City, Nevada; Dahlonega, Ga., and Charlotte, North Carolina. There are now three mints in operation, Philadelphia, San Francisco and Denver. The 1c and 5c coins are now coined at the Philadelphia, San Francisco and Denver mints.

MINT MARKS

Coins issued at the branch mints have a special mark denoting the place of mintage; they are small letters, as shown below, and are generally found on the reverse or "tail" side of the coin.

UNITED STATES MINT

Philadelphia, Pa.—Established in 1792. No mint mark.

Old Uncurrent Bank Bills

(Broken Bank Bills)

1800 to 1876.

A great number of notes in various denominations were issued by Banks and Banking Institutions prior to the Creation of the National Banking System, and which have ceased to be current since that time. Many of these banks have lived but a short time, having either failed or gone into liquidation.

For the issues prior to 1837 we pay 10 cents to 25 cents per note; later issues, \$2.00 to \$10.00 per 100 notes.

The alloy in silver coins of the United States is pure copper.

U. S. Mint Test for Gold and Silver

The following is a test for determining whether a coin is good or bad. Use liquids as near the edge of the coin as possible, as that is the part most worn. A drop of the preparation will have no effect on a genuine coin, while it can be plainly seen on counterfeits. Heavily plated coins should be scraped slightly before testing.

Test for Gold.

Strong Nitric Acid, 6½ drachms.
Mur. Acid, ¼ drachm, or 15 drops.
Water, 5 drachms.

Test for Silver.

24 Grains of Nitrate of Silver.
30 drops of Nitric Acid.
Water, 1 ounce.

The above test should conform with diameter, thickness and weight, the test used at the mint.

PAPER MONEY

UNITED STATES FRACTIONAL CURRENCY

Immediately after specie payments were suspended in the early part of 1862, when gold and silver coins disappeared from circulation, the place of subsidiary silver coins was for a time supplied by tickets, due bills and other forms of private obligations, which were issued by merchants and corporations. Congress soon authorized the use of postage stamps for change and then a modified form of postage stamps called postage currency and finally fractional currency in denominations corresponding to the subsidiary silver coins. There is over \$15,000,000 worth of this fractional currency still outstanding, about half of which is officially estimated to have been destroyed.

COIN COLLECTING as a hobby affords more pleasure and greater interest than any other collectable objects. It opens a wide field of study. It develops a taste for art and stimulates research in nearly every branch of learning. It teaches us history and geography, and while a very fascinating and instructive pastime, it has also been the source of much profit, as no one knows better than those who have collected coins in the past, that coin collections increase in value from year to year, thus providing an excellent investment. Coins are often the only historical records that we have of nations which have long since passed away, and which would have been buried in oblivion but for the coins that bear the names of kings and records of events relating to the countries whose money they once were.
